TELA

TELA è la nostra proposta per un sistema di ante che coniuga minimalismo strutturale e massima libertà compositiva.
È composta da un profilo perimetrale in alluminio e angolari in zama.

TELA is our proposal for a door system that combines structural minimalism with maximum compositional freedom.
Consists of an aluminium perimeter profile and zamak corner pieces.

COSMA COLORS

Con COSMA Soft Colors, la maniglia non è più solo un accessorio, ma un elemento di design che scompare o si fonde in armonia con il mobile.

Grazie al nostro avanzato impianto di verniciatura, siamo in grado di realizzare maniglie nel colore esatto richiesto.

L'eccellenza del design si unisce alla responsabilità ambientale. Il nostro impianto di verniciatura utilizza esclusivamente vernici a base acqua, riducendo l'impatto ambientale.

Le finiture Cosma soddisfano i requisiti della direttiva AMK Merkblatt 012, attestando la conformità agli standard in materia di durabilità, sostenibilità e qualità del trattamento superficiale.

La tua visione, il nostro colore.

With COSMA Soft Colors, the handle is no longer just an accessory, but a design element that disappears or blends harmoniously with the furniture.

Thanks to our advanced painting facility, we can produce handles in the exact color requested.

Design excellence combines with environmental responsibility. Our painting facility uses exclusively water-based paints, reducing environmental impact and ensuring a healthier final product.

Cosma finishes meet the requirements of the AMK Merkblatt 012 directive, certifying compliance with standards for durability, sustainability, and surface treatment quality.

Your vision, our color.
