FINITURE

FINISHES

Parallelamente all' aggiornamento tecnologico, produttivo e di design, Cosma ha continuato negli anni a ricercare e sperimentare nel campo delle finiture superficiali. I materiali lavorati, acciaio inox, alluminio e zama possono essere finiti con diversi processi: galvanica, verniciatura ed anodizzazione.

Over the years Cosma has continued to conduct research and experimentation into surface finishes. The materials used, stainless steel, aluminium and zinkral, can be finished using a variety of processes, including power coating, painting and anodization.
