TELA è una soluzione versatile e moderna per qualsiasi ambiente. Grazie ai suoi componenti, l'anta è facilmente lavorabile su misura e assemblata con precisione.

TELA is a versatile and modern solution for any environment. Thanks to its designed components, the door can be easily made to measure and assembled with precision.

Anta modulare per armadi e cucine

TELA è la nostra proposta per un sistema di ante che coniuga minimalismo strutturale e massima libertà compositiva. È composta da un profilo perimetrale in alluminio e angolari in zama.

TELA è stata progettata per adattarsi a diverse esigenze funzionali ed estetiche, infatti è disponibile un profilo con maniglia integrata che può essere applicato su uno qualsiasi dei quattro lati.

In alternativa, TELA è perfettamente abbinabile a meccanismi di apertura push-pull o tip-on, garantendo un fronte anta completamente liscio e minimale.

Modular door for wardrobes and kitchens

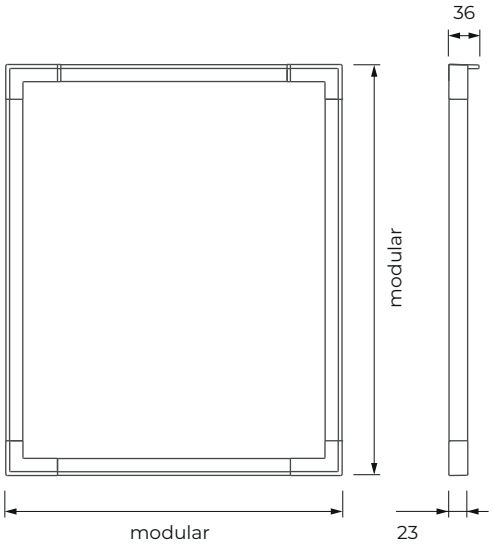

TELA is our proposal for a door system that combines structural minimalism with maximum compositional freedom. Consists of an aluminium perimeter profile and zamak corner pieces.

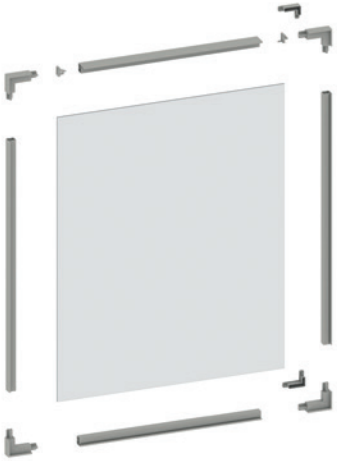

TELA has been designed to meet a variety of functional and aesthetic requirements; in fact, a profile with an integrated handle is available, which can be fitted to any of the four sides.

Alternatively, TELA can be perfectly combined with push-pull or tip-on opening mechanisms, ensuring a completely smooth and minimalist door front.

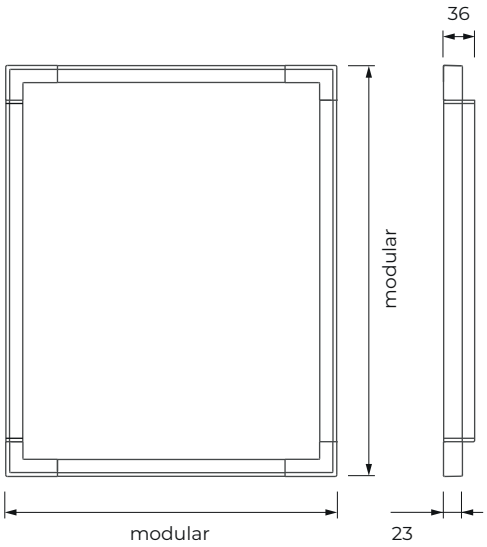

Configurazioni / **Settings**

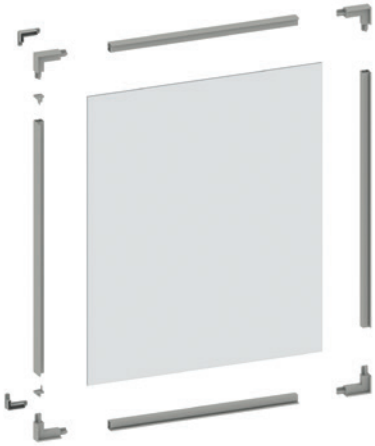

Posizione maniglia in orizzontale
Handle in horizontal position

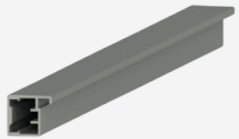

Posizione maniglia in verticale
Handle in vertical position
